DOL = Direct On Line, SDS = Start Delta Starting. Note 8 Bar versions of C40 are available on request.

- Simple Electro / Pneumatic control - stop / start operation no off load running
- Pressure switch control - fixed 2 Bar differential
- Low noise levels - unit can be sited next to air user
- Max ambient 40° C
- Wet air receiver configuration - drain point brought to front of machine for easier operation
- All service components grouped for easy access and service intervention

C55\* Versions fitted with Infologic Controller. DOL = Direct On Line, SDS = Start Delta Starting

- Infologic controller - intelligent controller with energy saving algorithm
- Pressure and temperature transducers for digital display on controller
- Low noise levels - unit can be sited next to air user
- Compact footprint - can be sited against wall, all configurations
- Max ambient 46° C
- Wet air receiver configuration - drain point brought to front of machine for easier operation
- All service components grouped for easy access and service intervention - service warnings through controller
